A results-driven software engineer seeking internships to enhance programming skills in creating innovative solutions. Experienced in contributing to large-scale projects with a focus on efficiency and user experience. Eager to apply a strong foundation in AI and full-stack development in a challenging environment. Committed to continuous learning and adapting to new technologies.

WORK EXPERIENCE

FPT Corporation | Software Engineering Intern | 06/2024 - 08/2024
- Developed and optimized FPT ICDP internal communication platform using Express.js, Node.js, MongoDB, PostgreSQL, RabbitMQ, Kafka, Redis, and React, leading to a 25% increase in collaboration across 15 internal teams, reducing communication delays by 30%.
- Leveraged TensorFlow and Optuna to achieve a 15% improvement in AI model fine-tuning and optimization.
- Developed a feature that allows users to create and manage their chatbots, increasing user engagement by 30%.

Huong Hua Co., Ltd. | Full-Stack Software Engineer | 12/2023 - 02/2024
- Utilized React, Django, PHP, MongoDB, and MySQL to create the company's English-version web app and job application database that handles over 50,000 active users, increasing operational efficiency by 40%.
- Deployed using Docker, AWS EC2, RDS, DocumentDB, S3, Gateway, and Route 53. Streamlined deployment processes and reduced infrastructure costs by 20% while managing approx. 200 job applications monthly.

VNG Corporation | Software Engineering Intern | 06/2023 - 08/2023
- Developed vCloudcam's security camera management website using AngularJS, React, Beego, Go, Java, Oracle Database, Red5, and Nginx, improving performance by 30% and supporting 50,000+ monthly visits.
- Enhanced video fetching & streaming system with Web Assembly, boosting live camera stream efficiency by 20% and reducing buffering by 15% for 5,000+ concurrent streams.

EDUCATION

Bachelor of Science in Computer Science & Bachelor of Arts in Economics, Expected December 2025
University of North Carolina at Chapel Hill, Chapel Hill, NC
- Cumulative GPA: **3.9 / 4.0**. On the Dean's List for 4 consecutive semesters.
- Relevant coursework: Data Structures, Algorithms, Machine Learning, Database Systems, Linear Algebra.

PROJECTS

- **The MovieVerse**: A comprehensive movie database featuring detailed information on over 1 million movies, actors, and directors. Currently supports 420,000+ monthly visitors, with 55,000+ active users and 145,000+ movie ratings. Built with a focus on scalability, responsiveness, and user experience.
- **Moodify**: A full-stack AI-driven music application using React, Django, and machine learning, featuring 30+ API endpoints and 15+ core functionalities. Integrated advanced data analytics and mobile app support.
- **DocuThinker:** A full-stack AI application for document analysis, serving 5,000+ active users and processing 3,500+ documents monthly. Achieved 95% accuracy in AI summarization, reducing manual document review time by 40%. Features include AI chat, key insights extraction, document saving, and secure authentication.

SKILLS

- **Languages:** Java | Python | JavaScript | TypeScript | C | Go | PHP.
- **Databases:** MySQL | PostgreSQL | Redis | MongoDB | Red5.
- **Data Analytics:** PowerBI | Tableau | Spark | Hadoop | SAS | R.
- **Web Development:** React | Vue | Angular | Webpack | WebAssembly | Flask | Spring | Django | Express | Node.js | OAuth | JWT | REST APIs.
- **AI/ML:** TensorFlow | PyTorch | Keras | NLP | Pandas | OCR | scikit-learn.
- **Mobile Development:** React Native | Kotlin | Swift | Flutter | Objective-C.
- **CI/CD & Deployment:** Docker | Git | Heroku | Vercel | AWS | GCP | Jenkins | Kubernetes.
